

I wish you would consider changing the current DMA for Sat TV in the 4 corners of Colorado to allow us to view Denver Channels. I am a registered Co voter and we can not watch state candidates present their views here but are constantly exposed to New Mex politics to the point I feel I should be voting in NM. Of course I am a Broncos fan and desire to see every game even after such a bad season as this one was. NM is Cowboy country. I am a great fan of Rocky Mountain PBS and think they far outclass the Albu PBS. The last time I was able to enjoy their programming was in the grand old days of CBand Sat TV, before these unfair regs were imposed upon the southwest portion of this great state of Colorado. Please allow us to enter into the 21st century and view our own states news.

Thank you for your consideration.
